New Revision Schedule for Wages and Salaries

In accordance with the new revision schedule announced last month, revised estimates for wage and salary disbursements and related income-side components for January 2002 through July 2002 will be released along with preliminary estimates for August 2002 on September 30. These revisions will reflect the incorporation of newly available wage and salary tabulations of employees covered by state unemployment insurance from the Bureau of Labor Statistics for the first quarter of 2002. Note that the incorporation of new source data for a given quarter usually results in a revision to the level of an estimate not only for that quarter but also for subsequent quarters. The measures that will be revised beginning with January 2002 are personal income, private wage and salary disbursements (including goods-producing, manufacturing, distributive, and services), personal contributions for social insurance, personal tax and nontax payments, disposable personal income (DPI), personal saving, real DPI, per capita DPI, per capita real DPI, and personal saving as a percentage of DPI.

Next release -- Personal Income and Outlays for August will be released on September 30, 2002 at 8:30 A.M. EDT.

^p Preliminary.^r Revised.

1. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

2. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of

the following month; the annual estimate is the average of the monthly estimates. Estimates for January 1991 through June 2000 are interpolations between Bureau of Census population estimates for 1990 and for 2000; estimates for July 2000 forward are BEA extrapolations. BEA will substitute monthly Bureau of Census population estimates for 1991 forward when they are released.
